About the Author

Howland Blackiston has been a backyard beekeeper since 1984 and an artist and craftsman all his life. He's written hundreds of articles and has appeared on dozens of television and radio programs, including shows on the Discovery Channel, CNBC, CNN, NPR, Sirius XM Radio, and scores of regional shows. He has been a keynote speaker at conferences and events in more than 40 countries. Howland is the past president of Connecticut's Back Yard Beekeepers Association, one of the nation's largest regional clubs for the hobbyist beekeeper. Howland, his wife, Joy, and their bees live in Weston, Connecticut.

Howland is the author of *Beekeeping For Dummies*, 2nd Edition, published by John Wiley & Sons, Inc. You can reach Howland by e-mail. He'd love to hear from you: howland@buildingbeehives.com.

Dedication

I dedicate this book to my beautiful wife, Joy, who has patiently spent many evenings and weekends alone while I worked on this book. She is, and always will be, the queen bee of my universe.

Author's Acknowledgments

Writing this book has been a labor of love, thanks to the wonderful folks at John Wiley & Sons, Inc.: Senior Acquisitions Editor Tracy Boggier, who approached me in the first place about creating this companion piece to *Beekeeping For Dummies*; Senior Project Editor Georgette Beatty, whose sound advice and superb organizational skills kept me focused and on schedule; and Copy Editor Todd Lothery, whose supreme wordsmithing elevated my narrative into something to be proud of. Also many thanks to the composition team at Wiley, who handled nearly everything to do with the way the words and images ultimately appear on the page. Kudos to cartoonist Rich Tennant (I'm a big fan), who has the enviable ability to take any topic and find the humor in it.

Special thanks to my friend Michael Lund, who generously served as my technical consultant on this project. Michael is not only a gifted craftsman and woodworker but also a supremely knowledgeable and innovative beekeeper. That's a great combination when it comes to building beehives!

New York beekeeper Andrew Coté contributed his urban beekeeping wisdom to Chapter 2, Michael Paoletto graciously shared his plans for making a Kenya top bar hive (Chapter 5), Ellen Zampino provided the inspiration for the elevated hive stand (Chapter 13), and Dennis Murrell allowed me to adapt his plans for the four-frame observation hive (Chapter 7). Felix Freudzon, of Freudzon Design International, expertly created the 3-D instructional illustrations in the book.

Early on, as I was deciding what topics I should cover in this book, a number of the members of Connecticut's Back Yard Beekeepers Association participated in a focus group at my home. Their insights and suggestions were very helpful in homing in on the topics that would become the contents of the book. Many thanks to Jon Dickey, Joe Fischer, Jerry Goodwin, John Grimshaw, Leslie Huston, Gabriele Kallenborn, Michael Lund, Marina Marchese, Bobbie Meyzen, and Mike Paoletto.
